

RESIN BOND DIAMOND TOOLING

TRITON® S-SERIES PUCKS

The SASE® S-Series is the newest resin line for SASE®. It has been formulated to produce the highest shine with increased gloss levels up to 50% higher than other resin diamond tooling. It also includes a 400 grit option allowing for transitioning sooner. It is great for those applications where gloss readings are a major specification factor

PRODUCT	APPLICATION	ITEM NO.
 3" 400 GRIT (RED)	Removes 200 grit resin scratches or next step after transitioning from hybrid resins. Used if higher gloss is required in final steps.	HOL.300724
 3" 800 GRIT (WHITE)	Removes 400 grit resin scratches and leaves a very high shine. Can be the final step in polishing application. Used if higher gloss is required in final steps.	HOL.300725
 3" 1500 GRIT (YELLOW)	Removes 800 grit resin scratches and leaves a very high shine. Can be the final step in polishing application. Used if higher gloss is required in final steps.	HOL.300726
 3" 3000 GRIT (GREEN)	Removes 1500 grit resin scratches and leaves the highest shine and the final step in polishing application. Used if higher gloss is required in final steps.	HOL.300727
 2" 1500 GRIT (YELLOW)	Removes 800 grit resin scratches and leaves a very high shine. Can be the final step in polishing application. Used if higher gloss is required in final steps.	HOL.200876
 2" 3000 GRIT (GREEN)	Removes 1500 grit resin scratches and leaves the highest shine and the final step in polishing application. Used if higher gloss is required in final steps.	HOL.200877
